Art Unit: 2829

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 9 and 17 -27, drawn to a floating and self aligning suspension system and a method of making this system, classified in class 324, subclass 763 and 158.1.
 - II. Claims 10 –16 and 28 -31, drawn to the test system and the method for making this test system, classified in class 324, subclass 765.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the test system is still able to perform the function without the floating and self aligning suspension system. The subcombination has separate utility such as to align all the other parts in the right order itself.

3. A telephone call was made to Ann M. McCrackin on 4//11/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
